Volunteers Wanted for a Research Study

Do You Have Chronic Low Back Pain **OR** Type 2 Diabetes **OR** Both?

We are currently recruiting participants for a paid research study that is identifying symptoms experienced, skills used to manage health, sensory function, and inflammatory, metabolic and genetic markers among people with one condition (**either diabetes type 2, OR chronic low back pain**), **OR** people with both conditions (**diabetes and chronic low back pain**).

Participation includes:

- Completing questionnaires about your pain and diabetes
- Undergoing a sensory assessment
- Providing blood and saliva samples

This study includes two visits to the UConn School of Nursing Pain Research lab in Storrs OR UConn Health in Farmington and participation from home.

You may be eligible if you are:

- Ages **18 and older**
- Have a smart phone
- Have low back pain for at least 3 of the last 6 months, **OR** have type 2 diabetes with low back pain, **OR** have type 2 diabetes alone.

You will **not** be eligible if you:

- are pregnant or within 3-months post-partum
- Type 1 diabetes
